

VALIDATED, PERSONAL HEAT DANGER — ANYWHERE

Real heat stress, anywhere.

See the heat your body actually faces — **validated, personal, and free.**

The thermometer ignores humidity, wind, and sun — the things that decide if heat is dangerous. **WetBulbTracker shows the real number (WBGT)** the pros use, made personal and hyper-local.

EVERYTHING IN THE APP

- Seamless global heat map
- Six ways to read the heat
- Sun vs. shade, exactly where you are
- "Safe for me" personalization
- Heat alerts that reach you first
- Every major city, one tap away
- Plain-language AI brief
- 7-day + hourly forecast
- Free WBGT & wet-bulb calculator
- Installable & free, works offline

Validated in public live accuracy vs. NWS	Personal to you your age, health & place	Free anywhere on Earth no hardware, no account
